Font Treatment | Format and Usage

Font treatments are provided as scalable vector artwork (EPS). EPS allows high-quality print reproduction. EPS files can be scaled to any size without sacrificing image quality.

You may use these files in page layouts and graphics programs for print projects. Additionally, EPS files may be used to create files in any other image format at exactly the size required.

Using the Font Treatment

Font treatments are intended for use in corporate materials referring to the specific offering(s).

A font treatment is a piece of artwork specially created and supplied in electronic files. Use only the files supplied by SAP. Do not alter the font treatment in any way.

Use “SAP Concur Partner” in quotation marks if you need to refer to the font treatment itself.

Examples:

The “SAP Concur Partner” font treatment ...

SAP grants partners the “SAP Concur Partner” font treatment to communicate their related offerings and services.

The logo consists of the words "SAP® Concur® Partner" in a bold, sans-serif font. The "S" in "SAP" and the "C" in "Concur" are dark grey, while the rest of the letters are orange. The registered trademark symbol (®) is placed after each of the two brand names.

SAP Concur Partner

Font Treatment | Clear Space and Minimum Size

Clear Space

Clear space defines the minimum "breathing room" around the font treatment and the minimum distance between the font treatment and the edge of a printed piece. Do not position any text, graphic element, or other visual marks inside the defined clear space.

Minimum Size

To ensure legibility, the font treatment should not be printed smaller than 1.93 inches, or 49 millimeters, in width. And should not be shown on screen smaller than 579 pixels. Always maintain the aspect ratio of the font treatment when scaling.

Using Registered Trademark Symbols In Text

Include the registered trademark symbol “®” on the terms “SAP” and “Concur” (SAP® Concur®) at first mention in a text. After first mention, you can drop the symbols.

Font Treatment | Color

Color Specification

The color of the font treatment is based on the SAP color palette. Instead of the SAP color palette, you may use the PANTONE colors listed here.

You will find the standards for these colors in the current edition of the "PANTONE Color Formula Guide". If PANTONE colors are not available, and you use process inks for the font treatment, use the values for the CMYK color model. For Web sites and on-screen, use the values for the RGB color model.

SAP Gold and SAP Dark Gray are the preferred colors for presentation of the font treatment. Use this version on white or light-colored backgrounds only.

Against dark backgrounds, use the font treatment in SAP Gold and white.

Applying the Font Treatment on Partner Assets | Examples

The following examples show how partners can place the "SAP Concur Partner" font treatment in relation to their company logo in their materials.

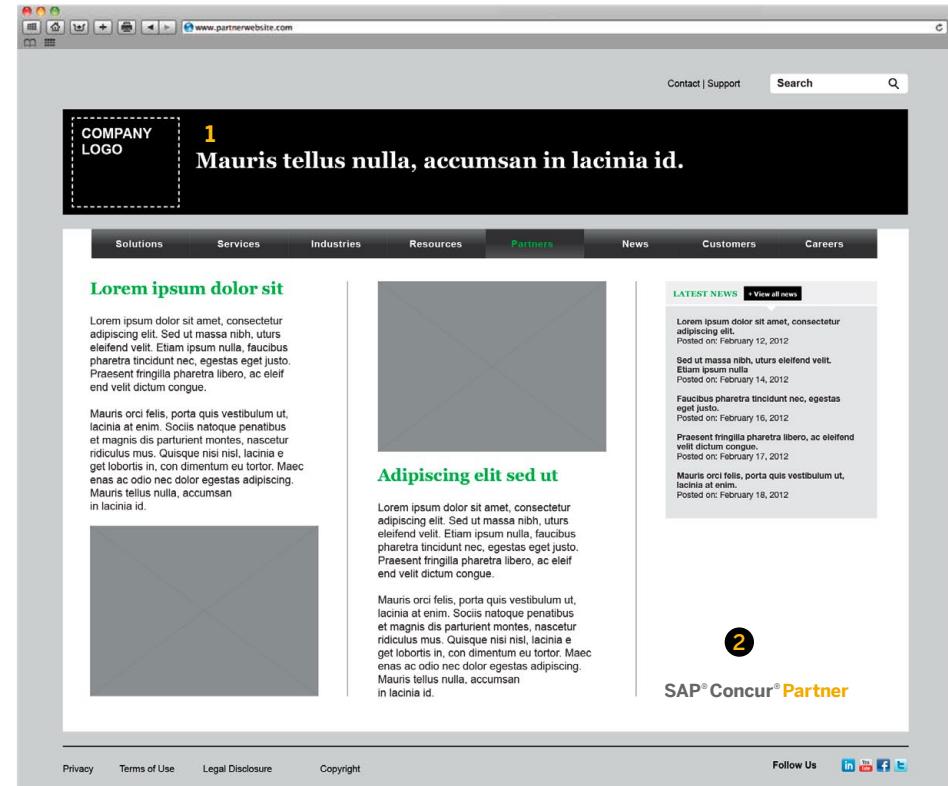

1 + 2

To protect SAP trademarks, do not directly connect the logos or font treatments with any text or graphic element.

Do not use the SAP corporate logo or the SAP Concur brand logo on materials owned and published by partners. You can reference SAP and SAP Concur offerings in text.

Use of the SAP name and/or logo signals that something is owned by SAP and that SAP is responsible and accountable for it.
